-

Item 3.01. Notice of Delisting or Failure to Satisfy a Continued Listing Rule or Standard; Transfer of Listing.

On February 26, 2013, iBio, Inc., a Delaware corporation (the “Company”) received a previously anticipated notice from NYSE MKT LLC (the “Exchange”) that the Company currently is below certain of the Exchange’s continued listing standards. The Exchange indicated that its review of the Company’s Form 10-Q for the period ended December 31, 2012 indicates that the Company is not in compliance with Section 1003(a)(ii), which applies if a listed company has stockholders’ equity of less than \$4,000,000 and net losses in its three of its four most recent fiscal years.

The Company is not required to submit a new plan of compliance to the Exchange. In place thereof, the Exchange has afforded and the Company has accepted the opportunity to rely upon the plan the Company submitted in response to the previously-disclosed letter from the Exchange dated November 21, 2012 (the “Plan”). However, if the Company is not in compliance with the Exchange’s listing standards by October 14, 2013, the timeframe contemplated by the Plan, or does not make progress consistent with the Plan, the Company will be subject to delisting procedures as set forth in Section 1010 and Part 12 of the Company Guide.

Item 8.01. Other Events.

On March 4, 2013, the Company issued a press release announcing its receipt from the Exchange of the anticipated notice of the Company’s failure to satisfy a continued listing standard. A copy of the press release is attached hereto as Exhibit 99.1 and is incorporated herein by reference.

Item 9.01. Financial Statements and Exhibits.

(d) Exhibits

<u>Exhibit No.</u>	<u>Description</u>
99.1	Press Release dated March 4, 2013.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this Report to be signed on its behalf by the undersigned hereunto duly authorized.

IBIO, INC.

Date: March 4, 2013

iBio, Inc. Receives Anticipated Notice from NYSE MKT that Company is Below Certain Continued Listing Standards.

NEWARK, DEL., March 4, 2013 – PRNewswire – iBio, Inc. (NYSE MKT: IBIO) today announced that it has been notified by the NYSE MKT (the “Exchange”) Staff that the Company is currently not in compliance with the listing standard set forth in Section 1003(a)(ii) of the NYSE MKT Company Guide. This standard applies if a listed company has stockholders’ equity of less than \$4,000,000 and net losses in three of its most recent four years.

As previously announced, in December 2012 the Company submitted, and the Exchange subsequently accepted a plan of compliance which is intended to restore the Company’s compliance with the Exchange’s continued listing criteria set forth in Section 1003(a)(iii) of the NYSE MKT Company Guide. These listing criteria apply if a listed company has stockholders’ equity of less than \$6,000,000 and net losses in its five most recent years.

Due to the higher stockholder’s equity requirement contained in Section 1003(a)(iii), the Company is not required to submit an additional plan of compliance in connection with the deficiency noticed in the Exchange’s most recent correspondence.

The Company, pursuant to an extension of time previously granted by the Exchange, must regain compliance with Exchange’s continued listing standards, including the criteria contained in each of Section 1003(a)(ii) and Section 1003(a)(iii), by October 14, 2013. During this extension period, the Company will be subject to periodic review by the Staff of the Exchange. The failure by the Company to make progress consistent with the accepted plan or to regain compliance with the continued listing standards by the end of the extension period could result in the Company being delisted from the Exchange.

About iBio, Inc.

iBio develops and offers product applications of its iBioLaunch™ and iBioModulator™ platforms, providing collaborators full support for turn-key implementation of its technology for both proprietary and biosimilar products. The iBioLaunch platform is a proprietary, transformative technology for development and production of biologics using transient gene expression in unmodified green plants. Advantages over other systems may include: success with proteins difficult or impossible to produce with other methods; broadly applicable to biologics, including therapeutic proteins and vaccines; production time measured in weeks instead of months or more. Additional benefits may include: surge capacity for remedial action against bioterrorism and pandemic disease; product entry that is unconstrained by traditional process patents, and significantly lower capital and operating costs for comparable production. The iBioModulator platform is complementary to the iBioLaunch platform and is designed to significantly improve vaccine products by increasing potency and lengthening duration of effect. The iBioModulator platform can be used with any recombinant expression technology for vaccine development and production. Further information is available at: www.ibioinc.com.

Forward-Looking Statements

Various statements in this release concerning iBio’s future expectations, plans and prospects, including without limitation, iBio’s ability to regain compliance with the continued listing standards on a timely basis constitute forward-looking statements for the purposes of the safe

harbor provisions under The Private Securities Litigation Reform Act of 1995. Actual results may differ materially from those indicated by these forward-looking statements as a result of various important factors including, without limitation, iBio's failure to make progress consistent with the plan approved by the Exchange or iBio's failure to meet other criteria necessary for continued listing on the Exchange, as well as those risks more fully discussed in the "Risk Factors" section of the documents filed by the Company with the Securities and Exchange Commission. In addition, any forward-looking statements represent iBio's views only as of the date hereof and should not be relied upon as representing its views as of any subsequent date. iBio does not assume any obligation to update any forward-looking statements.
